

**Stop traveling on site for support!
Let's stay Cosy!**

**Industrial
Remote Access
Routers**

The eWON Cosy (COMMUNICATION made eaSY) is an industrial VPN router designed to offer easy remote access, across the Internet, to machines and installations on customer sites or in the field. With eWON Cosy, OEMs and System Integrators can troubleshoot machines remotely without going on site, drastically reducing support costs.

Cosy 1 2 3

Why eWON Cosy is your best choice for remote access

EASY TO SET UP AND USE

Connect any Ethernet devices without the need to configure the gateway. No need to stop the machine while configuring the eWON.

- 1 An outbound connection is established to the Talk2M Server
- 2 eCatcher is used to login and connect to your remote devices.
- 3 A secure VPN tunnel is created giving full access to your equipment.

FIREWALL FRIENDLY OUTBOUND CONNECTION

Outbound Internet connection across the factory LAN using port 443 (HTTPS) or UDP 1194. Easy to set up with no firewall issues and only access to the machine. No access to the factory LAN.

INTEGRATED WIFI, CELLULAR CONNECTIVITY

WiFi and cellular modems allow Internet connectivity while avoiding connection on the factory/corporate LAN network. They offer free access, high bandwidth, easy deployment (no cabling) and facilitates security network management.

SECURE VPN CONNECTIVITY

Fully secure SSL-based VPN tunnel. The information exchanged during the communication is encrypted (SSL - 2048-bit keys) and only authenticated users can connect to the eWON.

CUSTOMER ACCEPTANCE

VPN access can be controlled with external key switch. All connections are tracked in a report.

LAN FIREWALLING

Control which devices connected to the eWON's LAN are accessible.

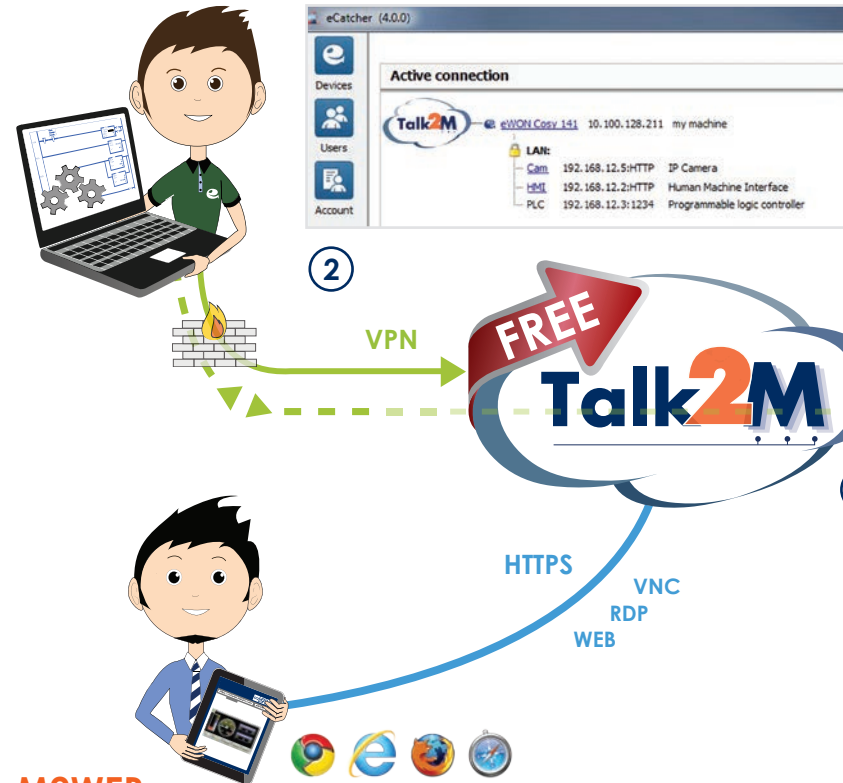

CONNECTING LEGACY SERIAL PLC

Large PLC support RS232/RS485/422, MPI/Profibus to Ethernet, compliant with world leading PLC manufacturers (Siemens, Rockwell Automation, Schneider Electric, Omron, Mitsubishi, VIPA, Modbus, ...).

NEW! ECATCHER

TALK2M VPN CLIENT SOFTWARE

eCatcher is a complete solution which allows remote PLC programming. Download eCatcher on www.talk2m.com

M2WEB

BROWSER-BASED MOBILE ACCESS TO REMOTE HMIs

Access and pilot your remote HMI from any device. Connect with M2Web on <http://m2web.talk2m.com>

THE FREE CONNECTIVITY VPN SOLUTION

Talk2M is the #1 secure industrial connectivity service. With servers spread out all over the world, Talk2M offers a highly reliable, secure and scalable solution for connecting to machines remotely. To date, Talk2M manages thousands of user accounts and has reached over 3,000,000 successful VPN connections.
